DETAILED ACTION

Claim Rejections - 35 USC § 112

1. Claims 1-20 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

Claim 1 specifies the step of "discriminating against cavitation events". However, the instant specification does not describe such a "discriminating" step and thus does not provide an enabling disclosure.

Further, with respect to claim 8, it is not clear where the "mapping" of cavitation events is described in the instant specification.

Finally, with respect to claim 12, it is questioned how an "electromagnetic pulse of energy" propagates through a fluid. It is questioned whether an acoustic pulse is what is propagated.

2. Claim 4 recites the limitation "the energy perturbations" in line 1. There is insufficient antecedent basis for this limitation in the claim.

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
